## Product Description

### M8 Panel Mount Connector IEC 61076-2-104 Female Rear Mounting PCB M8 x 0.5

#### Product Description

In industries such as steel smelting, M8 panel mount connectors face extreme environments such as high temperature, strong corrosion and heavy vibration. Its application features include excellent high temperature resistance, corrosion resistance and vibration resistance. For example, in the control system of steel-making furnaces, the M8 panel mount connector can work stably in high-temperature environments and accurately transmit control signals; in the highly corrosive pickling process, it can resist the erosion of chemical substances and ensure the safety of the equipment. normal operation.
